

Smart Lighting Control System

➤ 1.Application

- ◆ Data Center
- ◆ Office Building
- ◆ Hotel
- ◆ Stations and Metro
- ◆ Airport
- ◆ School
- ◆ Factory Building
- ◆ Bridges and Tunnel
- ◆ Shopping Mall
- ◆ Sports Stadium
- ◆ Logistics Center
- ◆ Hospital
- ◆ Exhibition Venue
- ◆ Landscape Lighting
- ◆ Residential Community

➤ 2.Structure

➤ 3.Main Functions

■ Manual control

■ Auto control

■ Scene control

■ Time control

■ Centralized control

➤ 4.Product Selection

Name	Type	Functions
Power supply	ASL100-P640/30	A standard power supply for the KNX/EIB system, coupling bus signals and monitoring overcurrent in KNX/EIB systems.
Switch driver	ASL100-S2/16	It can control 2,4,8 or 12 circuits.(Max. current:16A per circuit)
	ASL100-S4/16	
	ASL100-S8/16	
	ASL100-S12/16	
0-10V dimming driver	ASL100-SD2/16	It is used to control 2 or 4 circuits.(Max. current:16A per circuit)
	ASL100-SD4/16	It is suitable for the dimming of LED lamps and low voltage halogen lamps.
SCR dimming driver	ASL100-TD2/5	The SCR dimming module can adjust input voltage by phase control to realize LED dimming.
Smart panel	ASL100-F1/2	The smart panel can realize switch on-off, alarm function and control of dimming, scene, curtain and temperature.
	ASL100-F2/4	
	ASL100-F4/8	
Smart sensor	ASL100-T2/BM	It can sense both infrared and illuminance.
	ASL100-T2/BR	It can sense both radar and illuminance.
Binary input module	ASL100-DI4/20	It can realize different control requirements by passive contact input.
	ASL100-WI4/230	It can realize different control requirements by active contact input(12-230VAC/DC).
